

The Value of Comprehensive Security for Houses of Worship

JOHNSON CONTROLS SECURITY

Does it seem like your security systems aren't providing the protection and peace of mind you'd like them to? It's not surprising. Security risks are growing. Over time, your security needs have become increasingly complex. You have multiple technologies to understand and keep updated. Multiple vendors to manage. Too little integration among disparate solutions. And limited visibility and control. Without a full-time security expert in-house, it's a challenge to sort it all out.

As a result, your vulnerability is increasing and your security investment is delivering less value.

Johnson Controls understands the risks you're dealing with. We offer a way to make your security infrastructure more comprehensive, and easy to manage – thereby strengthening your protection and gaining more value from your security investment.

Comprehensive protection that's easier to manage

In an ideal world, your security infrastructure would be seamlessly integrated – making monitoring, management and control easier. Intrusion detection and video surveillance would be linked to enable seamless management, faster alerts, and more information for tracking if a security event occurs. Fire detection and access control could work together in an emergency. And you could monitor and control everything from a centralized location.

Johnson Controls is uniquely qualified to deliver security management that enhances protection of your people and property in a seamless, convenient way. We're not

only the nation's leading security integrator and building infrastructure management company – we're also a trusted, local advisor you can count on. We have the expertise, products, relationships – and local resources – to bring your entire security environment into harmony.

Our security solutions portfolio is unmatched

Johnson Control is the only provider of security products and services that can address all of your security needs, working to prevent loss, protect your staff and worshippers, and reduce the risk of fraud and liability. Our broad and deep portfolio of solutions includes:

Intrusion Detection Solutions

Johnson Controls keeps your property protected with a full range of advanced intrusion detection products. Our state-of-the-art Monitoring Center offers seamless, redundant coverage throughout North America.

Monitoring – 24/7 professional security monitoring team notifies authorities when alarm events occur.

Datasource – Access alarm activity data, system performance and maintenance activity on demand.

Our partnerships expand your capabilities

When it comes to integrating your security systems into a cohesive, easy-to-manage whole, no one is better qualified than Johnson Controls. Because we take a holistic view of your security environment, we're able to mix and match technologies to address all of your needs and concerns. As the industry's leading security integrator, we have established partnerships with other leading technology providers, so we're able to source and integrate all the components you need.

Our security professionals are industry-leading experts

Religious institution customers choose Johnson Controls because our experienced security professionals have the knowledge and experience to serve them in a way that respectfully meets their unique needs and local authority.

With more than 140 years of experience, our understanding of security is unmatched. So is our reach. We have over 200 offices in North America and serve more than 250,000 customers in the US alone. And we continue to invest in the future to keep delivering innovative, world-class security products and services to help keep congregations and staff safe.

In addition, Johnson Controls offers the ideal combination of local service and national support. Your dedicated local account management and technical team have the knowledge of your goals and needs, so they can customize a solution that's just right for you. Our professionally trained and insured installers and service technicians have an average of 16 years of experience. Backing them up are our award-winning Customer Monitoring Centers. With fully redundant monitoring, they provide 24/7/365 support for your security systems.

Get more value from your security investment

There are many ways to measure the increased value you get from your Johnson Controls security investment:

- Simplified management
- The ability to monitor and control systems remotely
- Easier growth and scalability
- Thwarting risks before they become problems
- Having fewer vendors to manage
- Better protection of people and property
- Greater peace of mind

Choose Johnson Controls to harmonize your security infrastructure – and discover the value of comprehensive security.
